

# AT126

## Green Curing Tape

### **DESCRIPTION**

AT126 is a green removable adhesive tape with a flexible, strong tensile polyethylene fabric backing and a pressure sensitive acrylic adhesive. It combines high tensile strength with excellent clean removability, making it well suited for masking, binding and temporary holding applications.

### **FEATURES**

- Good hand-cutness.
- Sticks and holds well on various surfaces.
- High tensile strength.
- Excellent clean removability.
- Waterproof and airtight seal.

### **APPLICATIONS**

- Paint masking and binding.
- Waterproof, airtight temporary holding or fixation of process materials in construction and contractor work.

### **PHYSICAL PROPERTIES**

|                   |                                     |
|-------------------|-------------------------------------|
| Color             | Green                               |
| Backing           | Polyethylene fabric                 |
| Adhesive          | Pressure sensitive acrylic adhesive |
| Thickness         | 5.71 mils                           |
| Tensile strength  | 18.3 lb/in                          |
| Adhesion          | 25.6 oz/in                          |
| Elongation        | <30%                                |
| Temperature range | 14°F to 140°F                       |

The physical and performance characteristics shown are averages obtained from tests recommended by ASTM, government agencies or our own procedures. A particular roll may vary slightly from these averages and it is recommended that the purchaser determine the suitability for his own purpose.
